N45453 Description of Accident

On August 2, 2023, at approximately 6:20AM after pre-flighting and loading N45453 with approximately 420 gallons of product and 100 gallons of Jet fuel at 8MN2 I was set for departure on runway 18. I began the takeoff roll bringing the torque to the bottom of the yellow arc, no anomalies were noted. During the takeoff roll the aircraft didn't appear to be accelerating as well as normal given the cool conditions compared to prior days piloting the aircraft with heavier loads with higher density altitudes. I attempted to jettison the load during and after liftoff. The aircraft was airborne for roughly 200 yards before settling into the surrounding soybean field. The aircraft sustained substantial damage and the pilot had no injuries.

Weather conditions:

Temp – 62 F

Wind – Light & Variable

Vis. – 10+

Sky – Clear
