July 15, 2023

1. Engine low power in flight. Run up checked low RPM, but smooth, leaned out and RPM came up 200-300 RPM at full throttle. Removed cowl, checked and removed air intake system, removed exhaust pipe and inspect muffler. Checked carb. heat valve and controls, checked carb. has fuel leak at parting surface, found all but 1 through bolts finger tight but lock tabs all bent locking bolts properly. Removed magneto and checked drive and points good, reinstalled mag. Check fuel filters, and primer in and locked. Ordered Marvel Schebler overhauled mag from Aero Accessory. everything inspected checked good except carburetor leaking.
2. Removed and replaced carburetor installed Factory overhauled MA-4-5 Pt No. 10-5034 S/N MS14LR03. Reassembled run up checked good, pulling full power RPM and manifold pressure.

With respect to the work performed, this engine is approved for return to service. Details of work performed are on file with Angelo Precision Aircraft, LLC under work order: 37347.
