Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to left wing, propeller, left main and cowling.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departure - Haven Center Airstrip - 26IN approximately 5:30 pm.

Sunday evening about 7:30 pm on August 20, 2023 my son Nathan and I, Steven Schrenk, were coming in for a landing in a Cessna-150, N4150U at Haven Center Airstrip from the north on runway 18 at about 65 mph airspeed.

We were on a normal approach at a left hand pattern. Winds were light with hot muggy conditions about 90 F.

At about 20 feet off the ground the airplane dropped hard and bounced one time. I was able to hit the main gear the first and second time the plane hit the ground. The right main wing hit the standing corn next to the runway. It drove the plane into the cornfield.

The plane nosed over at about 15 - 20 mph and came to rest upside down. The runway is about 60 feet wide.

Neither of us were hurt. The seat belts held us upside down safely. We were able to get out and shut off the fuel, electric, and mags. There was no fire.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This accident could have been prevented with a little more airspeed at touchdown in the hot muggy conditions.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
