Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine seized, prop damaged, nose gear destroyed, nose cowling, engine mounts substantial damage.
No property damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed MO56 at approx 2:45 local time on a part 91 flight headed to KLBO Lebanon, MO, a 68 nm trip. Approx half way to the Ava, MO airport at 2500 MSL the engine seemed to miss, as though a fouled spark plug - very subtle vibration. A few minutes later the prop RPM went uncommanded from 2400 RPM to 2600 RPM. I checked oil pressure and found that oil pressure had dropped below the green arc. A few minutes later the engine started a pretty severe vibration and the prop RPM went to 3000 RPM. I expected the engine to stop, so myself and passenger were already looking for suitable fields to land in, but we were still trying to make the Ava, MO airport. Shortly thereafter smoke exited the cowling and the engine seized. I turned immediately to a pasture to my left, lowered gear and flaps and made an off field landing in this pasture. It was about 3:00 local time. The aircraft hit main gear first, then the nose. We then hit a divot or low spot in the pasture and the nose gear sheared off. We skidded to a stop and exited the aircraft. Terrain was hilly and mostly forest. We were approaching the town of Ava, MO which is almost directly along the route from MO56 to KLBO, just slightly west of a direct line. The runway runs NW at 315 deg RWY 31 which is where I was aiming for. The pasture is .9 NM from the end of RWY 31 and we landed in the pasture east to west.
