Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Hit Trees
 Aircraft Tail separated from aircraft
 Rt wing destroyed
 Cabin structure cracked - Windshield flew out.
 Engine nosed into ground
 Prop destroyed

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On 9/7/23 I did a normal pattern at 4mi for Rwy 07. Because of a no wind condition I decided to do 30° flaps instead of my usual 15° for practice. I Bounced pretty good & decided to do a go around only because I wanted to do a better Landing. I applied full power and the nose pitched up and I entered an uncontrollable Lt bank which I was unable to correct. The airplane continued the bank into the Trees left of the Runway.

First debris 60 feet east of where airplane came to rest

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I have always been told to avoid 30° to 40° Flaps
but also think they need to be practiced

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
