

3. Operating Limitations

In order to safely enjoy flying your AirWolf Power Parachute, the following precautions must ALWAYS be followed. **Failure to do so could result in serious bodily injury or death!**

• Never fly in winds stronger than your piloting skills will allow you to be safe. Winds above 15 mph can be considered dangerous for a PPC.
• Do not fly in rain or snow, or when conditions could turn rainy or snowy.
• Never fly if you are impaired by alcohol or medications.
• Do not fly if you have any medical conditions which could cause you to black out or lose control of the aircraft in any way.
• Always fly from a field that is of sufficient length and free of obstructions.
• Always take off and land directly into the wind. NEVER take off or land with the wind.
• You should never attempt to operate your powered parachute without proper training.
• Use of helmets is always recommended.
• Your PPC should always be operated within the legal boundaries set up by the FAA for these types of crafts. This means you must be a licensed pilot and have your craft legally registered with the FAA and carry an airworthiness card and limitations.
• You may, under no circumstances, carry a passenger with a student pilot certificate.
• Never overload your craft or exceed the manufacturers recommended gross weight limit.
• Your craft must be carefully inspected before each and every flight.
• Always warm your engine up to operating temperature before flying.
• Always wear lap and shoulder belts.
• NEVER fly your aircraft if you know of a problem or suspect there to be one.
• Always fly in a safe manner, and never fly over anything that you wouldn't want to land on!
• Never modify your AirWolf PPC without the express consent of Powrachute, LLC.
