NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Jim King and John Wise arrived at KJKA on September 23, 2023 to fly N67CD to KHSD. The plane was parked at Coastal Aircraft Services. We inspected the plane, started it and taxied to Gulf Air Center and requested they top off all tanks, including tip tanks. Gulf Air installed 65.5 gallons of fuel on the plane.

We departed KJKA around 2:00pm and climbed to 10,000 ft. in route to KHSD. The plane performed well. All temperature were within the POH limits, including TIT and CHT. We were running rich of peak at approx. 23 gal per hr. We switched fuel tanks every 30 minutes and were utilizing the auto pilot. Minor adjustments were made to the mixture to lower the gph to 19.

About 2 hours into the flight, we turned on the tip tank pumps to transfer fuel to the main tanks. Approximately 30 to 40 miles outside of El Dorado we felt a slight vibration. We then moved the mixture back up to 22 gph. After a few minutes we moved the mixture back down to 21 gph and felt another slight vibration. We again moved the mixture back up to 23 gph. Shortly thereafter we felt the vibration again. At this point we contacted ATC and asked for a deviation to the nearest airport. We moved the mixture to full rich and reduced the throttle slightly and turned off the tip tank pumps.

A few minutes later the engine stopped. The prop continued to turn but the engine had stopped. We pitched for best glide speed and began the restart process and engaged the auxiliary fuel pump. When the pump was engaged the engine started back up. It ran for a few seconds and stopped. We continued engaging the fuel pump a few more times and engine would restart. However, after the fourth or fifth time the engine stopped responding to the fuel pump. We were in contact with ATC during this process. They had diverted us to F43 (El Dorado Downtown). We set a course directly to F43. We continued to descend. When we reached approximately 5000 feet, we realized we would not make it to F43. We began searching for an alternative landing area. Our options were very limited due to the forest surrounding us. We located a clearing to our left and turned the plane in that direction. We engaged full flaps and did not lower our gear. We cleared the trees and landed in the clearing. We immediately turned off the main and the battery, unbuckled and exited the plane. I was unable to turn off the key because it had broken off on impact. A Marine F-18 flew over us after we exited the plane and circled. We waived that we were out of the plane. We called 911 and were able to be transported from the scene 1.5 hours later. We left all the log books and related paper work in the plane.
