Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right wing damaged at impact with mower

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Before departing, checked weather and NOTAMS for route and destination. No NOTAMS, weather was clear. Contacted ATC at departure and set up flight following. Checked weather at McCurtain County about 20 miles out. About 10 miles out canceled flight following, Controller did not state any active NOTAMS at destination airport (90F). Started straight-in final approach to 90F five miles out to runway 17. Called my location and intentions to unicom at 5 miles, 4 miles 3 miles and approximately 1 mile. At approximately 3 miles, lowered gear and engaged 20 degrees of flaps. Airspace and Immediate runway environment was clear. Raised nose to slow plane down to approach speed (80-85knts). Nose of plane remained slightly elevated to control speed during approach. Once over the threshold, started to flare, nose dropped a little as the plane started to settle on the runway, saw small black lawnmower on right side of runway, pulled back on yoke to avoid collision, plane drifted to right a little due to lack of speed and crosswind, wheels touched, pulled back hard to "bounce over mower" wing contacted mower, plane settled on runway. Rolled out on runway, taxied back to parking.
