Subject: CEN24FA089 - Airplane Descent Profile

The following is a descent profile for N252DL. The airplane descends at about 600 to 750 ft per minute over a period of about 10 minutes before the airplane impacts the ground. This information was obtained from Automatic Dependent Surveillance-Broadcast (ADS-B) flight track data on, January 14, 2024. All times are in Coordinated Universal Time (UTC).

| Time (UTC) | Barometric Altitude |
|------------|---------------------|
| 18:04      | 6800ft              |
|            |                     |
| 18:04:30   | 6825ft              |
|            |                     |
| 18:05      | 6675ft              |
|            |                     |
| 18:05:30   | 6325ft              |
|            |                     |
| 18:06      | 6025ft              |
|            |                     |
| 18:06:30   | 5725ft              |
|            |                     |
| 18:07      | 5400ft              |
|            |                     |
| 18:07:30   | 5100ft              |
|            |                     |
| 18:08      | 4750ft              |
|            |                     |
| 18:08:30   | 4450ft              |
|            |                     |
| 18:09      | 4050ft              |
|            |                     |
| 18:09:30   | 3650ft              |
|            |                     |
| 18:10      | 3300ft              |
|            |                     |
| 18:10:30   | 2875ft              |
|            |                     |
| 18:11      | 2550ft              |
|            |                     |
| 18:11:30   | 2200ft              |
|            |                     |
| 18:12      | 1800ft              |
|            |                     |
| 18:12:30   | 1450ft              |
|            |                     |
| 18:13      | 1200ft              |
|            |                     |
| 18:13:30   | 1200ft              |
