NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of Friday, June 7 myself, my partner, and two of our sons decided to travel from Centennial to Fort Collins to retrieve a vehicle to use for family that was traveling to the area for the weekend. We have a son that is interested in aviation so he and I performed a thorough preflight inspection. The oil level at the time of preflight inspection was between nine and 10 quarts and we topped off the main tanks for a total of approximately 80 gallons of 100LL. Following a run up, centennial ground and tower allowed us to depart runway 17R to the south. The takeoff went smoothly until we got to approximately 7000 feet. I noticed a slight drop in manifold pressure. However the aircraft was still able to climb. There was another aircraft in the airspace that made a distress call of which took off in front of us. He was turning east and was going to take runway 28. I considered turning west and taking runway 10 however due to the aircraft in distress, I made the decision to try to make BJC. I climbed to 7500 feet approximately and attempted to adjust my throttle and mixture and prop to attain a higher manifold pressure. I had Denver center dialed in on the radio to request via our flight to Fort Collins, but quickly changed to BJC tower.. I knew something was wrong and wanted them to know that I was coming. I noticed the oil light illuminate, I quickly within seconds notice that our oil pressure was dropping rapidly, a couple seconds after that I noticed the engine running extremely rough, and a few seconds after that the engine engine quit completely. I was scanning the land looking for Off airfield landing spots. To the west I noticed a railroad track and a long straight residential street. I immediately turn the aircraft towards these two landmarks adjusted my airspeed glide at approximately 114 kn. I then made the decision to land on the residential street because if I recall correctly, I noticed more obstructions at a certain point of the railroad track that concerned me. I also noticed that there was no moving traffic or humans on the street. I knew there were power poles. I knew there were powerlines, running parallel, and perpendicular to the street and I immediately started timing how I was going to avoid these obstructions. I briefly prepared the passengers and I got to work getting the plane on the ground. I did not extend my landing gear because I did not want to affect our flight path by enlarging our surface area, increasing the risk of hitting an obstruction. I recall hitting the pavement fairly hard, but we were moving, and I remember the fire starting immediately on the left wing quickly spreading to the right wing. My right seat passenger was having difficulty getting the door open due to the fire and heat. I told him he had to go quickly and I had to help him get his seatbelt off in order for him to exit the aircraft. I immediately removed my seatbelt, moved to the right seat, I stood up as best I could and started receiving burns. Then quickly went back inside to remove the two rear seat, passenger seatbelts, and remove them from the aircraft. I believe I removed both seat belts at the same time, I grabbed my son that was in the back right seat first and got him out to the wing, trying to avoid the flames, the front seat passenger aided me with his unconscious body after outside the aircraft. I then re-entered the aircraft and grabbed my partner and proceeded to get her out in the same manner. At this time, I noticed people starting to gather one kind soul that I recall Came to help me move her unconscious body away from the fire and closer to my son so I could address both at the same time. At this time the first police officer showed up she helped me work on the two unconscious passengers quickly after the first unit arrived, and, began to work on all of the injured. I was not separated immediately from everyone, but it gets very blurry at this point second firetruck arrived and began to work the fire at about the same time three ambulances arrived and rushed us to the Lutheran Hospital. We were all separated, and I did not know where everyone was. I later discovered that one child was airlifted to children's. Another child was moved to UC Health. While myself and my partner were monitored and taken care of at Lutheran Hospital. Shockingly after approximately six hours of observation, treatment, and a CT scan I was released to go be with my partner who was rapidly deteriorating.

ADDITIONAL INFORMATION (Please type or print in ink)

Prior to accident: On the weekend of May 31 the entire family traveled via car and 150 whiskey Romeo to the city of Grand Junction from Fort Collins Colorado to attend one of the kids baseball tournaments.

A return trip from Grand Junction to Centennial Colorado was completed successfully on Sunday June 7. Times are unknown, however ForeFlight documented the trip. I am disclosing this trip to clarify that the aircraft was performing flawlessly at this time.

On Tuesday, June 4, the aircraft was admitted to professional aircraft services for a routine oil change. The aircraft stayed in the professional aircraft services hanger for three days. I picked up the aircraft on Thursday June 6th. I was notified that an oil change was performed. However, three loose bolts were discovered on the turbo which were replaced as well as a number of bolts on the exhaust system that were corroded therefore replaced as well.

Due to experience and a small hiccup in past years when retrieving aircraft out of maintenance, I performed a lengthy, preflight inspection, a lengthy and thorough run up, and I proceeded to take off from Loveland Fort Collins and make one lap in the pattern. I performed one touch, and analyzed how the aircraft was performing. I then continued after the touch and go to Centennial to meet up with my family. I make it a habit to test fly my aircraft with only myself on board after maintenance for safety reasons. The flight to Centennial was successful and the aircraft appeared to perform well.

After: On Saturday, June 8 at an unknown time I was told that she was not going to make it and that she was an Organ donor and that family was in route.

At some point on Saturday an amazing friend aided me in traveling to children's Anschuts and UC health to be bedside with the two children. We also returned back to Lutheran to be with my partner and to meet with family.

I believe the time of death was pronounced on Sunday, June 9 at 12:52 PM in which I was not able to attend.

Please note that in 2023 I had a prop seal replaced in 150WR with Professional Aircraft Services, who is the same outfit that worked on the plane preceding the accident. Following the prop seal replacement I had to make an emergency landing. The findings were a shop rag was left inside the prop therefore hindering prop function causing an emergency. Made it down safe.
