

Laura Abraham
Air Safety Investigator
Central Region

Date: December 4, 2025

Subject: CEN24FA218 - telephone conversation

Contact: Blake Thomas, Business Development, Poplar Grove Airmotive

Mr. Thomas stated that the fuel pump with serial number 066JI5 was the fuel pump that was put on engine serial number L-28665-51A when that engine was overhauled at Poplar Grove Airmotive in May 2019. They received the fuel pump from Tempest Aero Group in April 2019.

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.
 Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the Country specified in Block 1.
 Statement in Blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
