Aviation Safety - Central Region

Subject: CEN24FA228 ADS-B data review

The pilot's last recorded entry in his pilot's logbook was December 28, 2021.

A review of maintenance logbook entries found that the last combined 100-hr/annual inspection was conducted on June 19, 2023. Using commercial ADS-B services, the airplane had flown the estimated times below with mountain daylight savings time.

Date	T/O	Land
19 June 2023	1602	1635
19 July 2023	1745	1800
30 March 2024	1545	1630
3 April 2024	1618	1654
4 April 2024	1725	1845
12 June 2024	1657	1850

Since the annual inspection, the flight had flown approximately 5.5 hours. It is unknown if the pilot was the person operating the airplane for each of those recorded flights.

The pilot also owned a Cessna 414, N1563T. ADS-B data recorded the last flight as August 1, 2023.
