NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

During the flight, we heard shots from semi-automatic weapons in the direction we were flying, they were repeated 2-3 times a minute, we thought it was Texas Cowbiys seeing the Chinese spy balloon and shooting at us, we knew that if we reduced the altitude, we would fly in a different direction, so don't fly to the place where we heard the shots. After a short discussion, we decided not to continue the flight for another night, but to find a place to land and end the flight. During the descent, we prepared the balloon for landing, prepared the braking line, continued the descent, being ready for winter landing behind the road and trees, we observed a change in wind direction, ground thermal winds directed us towards the transformer station, with a continuous descent of 0.5 ms we saw the transformer station next to the line nrgtyka in front of the station. We poured ballast to increase the height of the balloon, it did not react, we poured 4-6 bags. I saw that with this direction and descent we will fly over the power line, but we may not be able to change the altitude in time to avoid hitting the steel masts of the transformer station. I decided to quickly open the parachute flap and land in front of the power line and the station. I gave the command "hide in the basket" and we flew down - we hit the ground just before the line, but the shell, with the help of the wind, leaned against the power line and I saw sparks being created. the wood-oxygen mixture in the coating exploded. I got out of the basket on my own, and Co-pilot Piotr Halas was pulled out by random witnesses. Everything was already on fire then. The balloon completely burned down, the shell, the basket and all the equipment. We suffered numerous injuries, breaks, burns, bruises and abrasions. We were taken by an ambulance and a helicopter.
