Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing dented.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I arrived to KMOP airspace from D95. I wanted to send some time in the pattern for a few takeoff and landings. After three full stop landings I was landing runway 27. With 5-10 seconds of touchdown, I saw something in my left peripheral vision. I turned to see a doe whitetail deer in front of my left wing. The deer leaped up in air trying to avoid impact. The leading edge of the left wing struck the deer broadside. After impact the deer was catapulted up and over the left wing.

As I was on centerline during this landing, the aircraft pulled very hard to the left, but I was able to maintain control and center the aircraft back to the center of the runway.

As there was no damage that impeded the aircraft to taxi, I continued to taxi to my hangar on property. Upon shutdown, I immediately called the airport manager. I informed him of the wildlife impact.
