Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft right outboard wing leading edge crushed. Right wing upper skin wrinkled/buckled. Propeller strike on hangar door.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At about 0830 local time, November 8, 2023, I landed at Hicks Airfield T67 in Fort Worth, Texas, an uncontrolled airport. This was my first visit to this airport. As I was taxiing to my destination, I struck something with the right wing causing me to crash into a hangar.

Conditions were sunny, dry and clear. The taxiways at Hicks are very narrow, such that my wingtips extended over both the edges. Even the ramps in front of the hangars are not wide enough to permit parking an aircraft clear of the taxiway. Also, many vehicles (cars and trucks) use the taxiways but are supposed to give way to aircraft.

I was on the taxiway centerline at normal taxi speed, when a motorcycle appeared on the taxiway coming toward me. While focusing on the intentions of the motorcycle, the right-wing tip of my aircraft impacted an object and swung me sharply to the right. My aircraft has a castering nose wheel and can only be steered by differential braking.

I attempted to hard left brake and swing back to the taxiway but the right outboard wing impacted the corner of a hangar on the right side of the taxiway, and that impact swung the aircraft back to the right and the nose and propeller impacted the door of that hangar. The whole episode was a matter of seconds. It turns out that the object initially hit by the right-wing tip was garbage cans left on the edge of the taxiway at the previous hangar. The garbage cans were full and fairly heavy. The cans were also in the shadows and I did not see them as I was watching the motorcycle.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Restrict ground vehicle operations on taxiways. Regulate the placement of garbage cans or other objects such that there is a penalty for interfering with taxiing aircraft. Require garbage cans or other objects that are to be placed in the vicinity of taxiways to be brightly colored or have flashing lights on them. Add a warning to the Chart Supplement.
