Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose gear collapsed on rollout

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a part-135 flight from KABQ to KHYI, upon landing, I ran off the end of runway 13 at KHYI. No injuries.

I touched down within the touchdown zone, stepped on the brakes, and deployed the spoilers, but the plane did not seem to be responding to the brakes and was not slowing down. The deceleration rate was not enough to stop by the end of the runway, and I was going too slowly to do a safe go-around. I decided I would be safer going off the end of the runway slowly than fast with the engines at full throttle if the go-around was not successful.
