

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Park Rapids State: MN

ZIP: 56470 Country: US

Latitude: 47-02-44.8520N Longitude: 095-07-21.0750W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 01/09/2024 Local Time: 3:35 PM
mm/dd/yyyy

Time Zone: CST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N1401V

Manufacturer: Piper

Model: J3C-65

Serial Number: 10771

Year of Manufacture: 1943

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 1220 lbs

Weight at Time of Accident/Incident: 1045 lbs

Number of Seats: 2 Flight Crew Seats: 1

Cabin Crew Seats: 0 Passenger Seats: 1

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing end is crushed, dented in multiple places from tree impact, left landing gear is folded back, left rear fuselage is bent and fabric is tore. Engine is pushed back and engine frame mounts are bent, prop is bent on one side, Right wing has dents and fabric is tore in multiple places. Door frame is broken, front lower braces are bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I called weather in KPKD at 3:01

Wind was light and variable at 3, broken 1200 , 10 miles visibility.

Called weather in DTL, they were clear, no wind, 10 miles.

I checked weather on my iPad in foreflight, all looked OK. I did not take the iPad with me.

I went down to my hangar around 3:05pm.

Opened the hangar door.

I added 5 gallons of 91 oct. gas to the header tank.

I sump d my 2 front fuel drains.

Checked the oil, 3.5 on the dipstick.

Did my walk-around, checked inspection covers, all control surfaces, tires/brakes. Full pre-flight.

I pulled the prop through 3 times.

I unplugged the oil heater and rolled the J3 out of the hangar.

I closed the hangar door, pulled the winter engine cover and put it and a cord in the rear luggage area.

I pulled the prop through 3 more times.

Got in and I started the J3 and let it run for 10-12 min. until the oil temp gage started moving. She started right up; oil pressure was good.

I shut it down, got out, pee d, took a picture and called my wife to tell her I was leaving, that was at 3:34PM.

Got back in the back seat and started it up again. I shut and latched the window and door. Placed my phone in its strapped holder up high. Put on my helmet and lap belt. I taxied short of 31, did my run-up. Mag check, carb heat. Moved the stick full forward, full aft and full left/right. All checked perfect. While I taxi, I am always moving everything, all was free and doing what its supposed to. There was

2 of snow or so on the taxiway and runway.

I announced on 122.75 that was taxing onto 31. I pulled onto the runway between the 3 end markers cones and the 1st single cone.

Checked everything one more quick time, announced I was departing and pushed the throttle full forward. Take off roll was normal, tail came up normal, she tracked down the center straight. I cleared the trees around the 1st hangar (lrg grey hangar) 100-120 agl. Very quickly she started turning/pulling left in a descending turn. Nothing I did made any change in the left turn. I briefly thought about pulling the power and trying for the runway, I was over the trees along the runway, the left wing was low and I was worried about a stall spin, so I kept the power in until I hit the 1st tree, I was worried that I would hit the hangar (2nd white hangar) figured the trees would be better.

As I hit the trees, I was pointed 90 deg left of the runway, the trees turned me 90 deg (facing 13) and pointed me down. The trees took most of my momentum away. I think I hit 4-5 trees. I was looking almost straight down at this point. The tree part was very violent, the fall and stopping was much gentler than I would have thought it would be. I heard my ELT in my headphones go off as soon as I hit the trees. The engine stopped on its own, I think when I hit the trees but am unsure on this.

I shut off the key and battery and got out quickly. I was afraid of gas leaking and fire.

Frank Schafer was the 1st person on the scene, maybe a min after it was over. I called my wife at 3:39.

I called the local deputy sheriff, our neighbor on his cell, Scott Parks, not 911. I was not injured; the airplane wasn t on fire. I didn t feel emergency services were needed.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am unsure of what caused the left turn/left decending. Take off and the climb were normal to 120' agl.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
