NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 12:30pm CST on Jan 21, 2024, I Scott Drenner (pilot) was returning from a flight earlier in the day from KJVL in a Robinson R22 Helicopter (N8350M). The destination of this flight was KENW. Weather conditions at the occurrence were VFR and winds were approximately 210 @ 10kts. I was cleared by ATC for landing at the North ramp of the airport. Upon reaching the North ramp, I attempted to land. My first attempt to land the helicopter was successful but I was not satisfied with the alignment of the helicopter on the landing pad and elected to lift the helicopter back into the air and attempt a more aligned landing. Upon my second landing attempt, control of the helicopter was lost as it settled onto the landing pad. From what I can recall, the helicopter ascended roughly 20 feet then rolled right then impacted the ground, collapsing the landing skids and shattering the windshield. The entire accident sequence lasted roughly 5 seconds. I sustained facial lacerations from impacting the windshield and fractured lumbar vertebra from the impact forces. I did not lose consciousness during the event and was able to extricate myself from the helicopter. I was transported to Aurora Hospital Kenosha by ambulance for initial triage and treatment of my facial lacerations; I was transported to Aurora Hospital Summit by ambulance for treatment of my back injuries. I was admitted to Aurora Hospital Summit on Jan 21, 2024 and discharged on Jan 23, 2024.
