NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I, Jin Seong, was acting as PIC on January 29 2024 when the incident occurred.

This statement is true and to the best of my knowledge all details about my flight as I recall them are provided here in the order from departure until time of incident. After performing a preflight inspection and run up per the checklist I Jin Seong and my passenger Chang Hwan Moon also a CPL holder departed GKY Arlington Municipal Airport approximately at 7:50pm inbound for GGG East Texas Regional Airport for a routined time building flight exercise both left and right fuel tanks were full to max capacity at take off. Upon arrival at GGG East Texas Regional we landed and came to a full stop and proceeded to back taxi for another takeoff for our destination TRL Terrell Municipal Airport. After landing at TRL we came to a full stop and attempted to refuel the aircraft but the fuel pumps were out of order so we verified the remaining fuel with a fuel stick. RH side fuel tank measured in at 4 gallons and the LH side fuel tank measured in at a little above 12 gallons. After starting the engine we noticed the aircraft had a rough idle and then continued to taxi to perform the run up before takeoff per the checklist provided. As I attempted the take off for our new destination to HQZ Mesquite Metro Airport to refuel the aircraft the engine failed shortly after takeoff at about 400 to 450 AGL I attempted to restart the engine and was successful however it immediately stopped running again. I then executed an emergency landing with the intent of landing on a nearby street that was visible from the air with the best lighting conditions during the attempt I recall the right wing of the aircraft being struck by something and then followed by a crash landing the incident happened so fast that I can't recall what it was exactly that was hit. After landing the passenger and I exited the aircraft still in shock from happened to secure our safety from the aircraft in case of a possible fire. When we were a safe distance away we immediately called the NTSB phone number to report the incident followed by a phone call to Fort Worth Center. The police arrived shortly afterwards along with an ambulance to examine our injuries we sustained during the crash. I suffered from stiffness in my neck and back pain from the abrupt landing and my friend was told to be seen by a hospital for the laceration between his eyes. We declined to be transported to the emergency room by ambulance and decided to called my wife to take us to the emergency room were I was further checked out for injuries and my friend received stitches for his wounds.

I think I speak for both of us when I say we are great-full to have walked away from the this unfortunate experience.

Jin Seong
