Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Outer six feet of left wing damaged. No property damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was in a thermal turning to the right. I climbed from about 1800 to 3000 feet. As I was headed east in the turn I saw another glider in my 10 o'clock position, at about my altitude, about one and a half seconds before impact. I instinctively banked right away from the aircraft and my left wing tip which was above me in the bank struck the other glider's right wing about 2/3 from wing root as he was also in a right bank and his right wing was below him. After the impact we established radio communications and both headed back to our air field, landed safely and stowed our gliders back in their respective hangars.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Obviously both of us pilots should have done better job of seeing and avoiding each other.
My glider has FLARM. The other glider does not. If both gliders would have been FLARM equipped, we would have gotten a traffic alert which would have helped in seeing and avoiding each other.
The other glider has ADS-B.
