Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Started to initiate a takeoff by easing upon the collective. When the skids started getting light I felt the helicopter pull to the left, and at that point applied Right pedal while pulling upon the collective. As soon as my skids were off the ground the helicopter spun harder to the left. At this point I couldn't overcome the spin and helicopter spun around and turned over.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

By putting the collective down as soon as the spin initiated.
