Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft cabin and left wing burned substantially.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

While enroute from KBWD to KGDJ, I noticed a strange chemical smell that I did not recognize when in the vicinity of Dublin Municipal Airport (9F0). The smell did not seem to increase in intensity, and I could see no smoke. Engine power was normal and was set at about 2350 RPM. All temperatures and pressures were showing normal, and I saw no unusual activity on the ammeter. Also, external and panel lights remained on and looked normal. Approximately 8 miles east of KSEP at 5500 ft, the oil access door on the upper right side of the cowling popped open with bright orange flames coming out. I immediately secured the engine and dove to around 140 MPH in an attempt to extinguish the flames. During the dive, I turned the aircraft towards HWY 377 due to known fields near the road, and the amount of smoke in the cockpit increased rapidly. At some point during the descent, the flames died down but never went out. Due to the smoke, the instruments were hard to see, but after noticing that I was below 2000 MSL, I slowed to maintain best glide (65 MPH) as best I could. I also had the aircraft in a forward slip to slow and rapidly decrease altitude but went to wings level when I knew I was getting low. I still could not see the ground well, but ultimately saw the ground rushing up out of my peripheral vision. At this point I flared the aircraft, and it touched down relatively gently in the three-point attitude. Once the aircraft slowed down and approached a fence line just south of the highway, the left wing struck a telephone pole, veering the aircraft to the left and bringing it to a complete stop. The fire was clearly still burning, so I immediately exited the aircraft and ran to a safe distance. Throughout the approach, I deliberately left the master switch on to allow my lights to make the aircraft as visible as possible to people on the ground. Also, I had hoped to make a mayday radio call, but was unable to do so because of the amount of smoke and significant difficulty breathing.
