after doing "pre flight and checklists" I tuned to radio for information at about 3:29 did "run up" got Taxi clearance and taxied to runway 32 got takeoff clearance and began to do "touch and go's" as student solo took off ran the pattern got clearance to land with updated winds began doing final approach procedures came in touched down slightly right of center line began "clewing up" aircraft and moving back to centerline plane pulled hard left hit right pedal to straighten up over corrected left off pulled power hit brakes came off runway into mud almost stopped hit concrete slab flush with ground bounced up front wheel dug into mud and plane flipped cut power and mags and got out.
