Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Helicopter Tail Boom sheet metal buckled in multiple locations near the frame attachment.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On March 26, 2024, at approximately 1345 hours, I was preparing for a solo training flight in N67183 (TH-67) helicopter from Baton Rouge Airport to False River Airport. After preflight inspection was completed, I started the helicopter with no issues. While taking off from the cart, the helicopter abruptly began yawing to the right. I proceeded to apply the correct amount of opposite anti-torque pedal to stop the yawing. However, the helicopter continued to rotate as I was leaving the cart. While airborne, for a brief moment, I was unable to maintain control of the helicopter, and the helicopter started traveling toward the hangar building. After regaining control of the helicopter I turned away from the hangar building to avoid impact and attempted to land on the ramp near the hangar. The helicopter made a hard landing near the hangar building. Afterwards, the helicopter was relocated to an area away from the hangar building and the helicopter was rolled down to idle. The helicopter was placed back on the cart by Command Pilot Keith Gros.

In conclusion, my initial thought during the incident, is that the helicopter's controls felt normal while picking up off the cart. After clearing the cart, I felt the helicopter abruptly start yawing without my input. After making the needed correction, the helicopter continued to rotate until I was able to regain control by rolling off the throttle to idle.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Develop education and training materials for helicopter cart landing. The learning activities need to allow low time pilots the opportunity to apply the principles learned in the classroom and in the cockpit. Set up guidelines for low time pilot to place cart in the open ramp area and remove the tractor.
