Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The prop was bent, the landing gear was folded, the left wing had a significant indentation from a tree, the doors were unable to be opened normally, the right door was torn off, the window of right door was broken out to exit aircraft, the rocket was cut to prevent from deploying.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was on an IFR flight plan. I waited until I was 5 Nmiles from airport and had it in sight before canceling my IFR. I flew over the airport first to get a good look at it and make sure I was choosing the correct runway to land. There was no rain and visibility was good, tops at 3000 and I was at 1700. I performed a proper sequence to land and I did land – but when the tires were on the ground I hit the breaks the plane started to skid and actually accelerate not decelerate so I attempted a go around and realized I would not make it over the trees at end of the runway so I again pulled back power in an attempt to slow as much as possible before impact. Thankfully we had just enough speed to make it over the creek at the end of the runway and we were no longer airborne so we impacted at ground height but past the creek bank.
