NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a Skydiving flight from KBUM, Uneventful climb to 14000 msl. On jump run as the first skydiver climbed out he scraped his Emergency parachute handle and his emergency parachute deployed over the horizontal stabilizer and drug him into the horizontal Stabilizer. I heard a loud Bang and focused on controlling the aircraft. I had No rudder or elevator control. As 4 more of the jumpers left immediately after, the nose of the aircraft dropped straight down. I watched the last jumper head to the door and I released my seatbelt. I worked my way to the open cargo door and pushed free of the inverted aircraft. I flew away from the aircraft and turned to look back at it and could see the whole tail assy bent back at 45 degrees. The aircraft spiralled into a farm field. I opened my round emergency parachute and landed safely in the parachute landing area. The First Jumper to Exit with the Premature parachute deployment flew is good parachute back to the airport and All had landed safely.
