Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft completely destroyed. Cabin was minimally impacted with damage, but tailboom was separated and main rotor blades were still attached, but bent and damaged. No fluid leakage from aircraft (fuel or oil). Engine is still intact.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

My son and I took off from our residence around 1800L for just a casual flight to look at our crops and livestock around the farm and enjoy the nice weather and evening. We flew over our neighbors house and saw them outside waving. I circled around and was going to see about landing into a confined area of grass on my side of the fence. My approach path was from the south to the north. I was watching the power lines on the west side of the helicopter and simply did not see the ones across our path. It all happened so fast that it is hard to recall what exactly happened, but I believe we caught a skid on the top wire that pulled us around causing us to nearly flip and start to spin. I attempted to maneuver the helicopter to the ground by closing the throttle. I "think" that the sun was just at the right angle from the west that I just missed seeing the wires. I recall trying to get the helicopter on my side to protect my son in the left seat, and that happened, but not sure if it was because of my actions or not.

We landed in the middle of the blacktop road in a blind spot of the highway. My son exited immediately and came to help me get out. At this time the neighbor was running towards the helicopter and I told them we needed to get it off the road before someone crested the hill and hit it. We threw most of the parts of the road by hand and then moved the main fuselage with a john deere gator. The road was clear before emergency personnel arrived.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

There is no story or excuse how this accident happened, however, I have been thinking about the incident heavily and I do think that complacency could have been a small factor. It is very rare for me to fly the R22, but I did enjoy it from time to time. I normally fly a Robinson R66 for my employment. The R66 is state of the art with taws, and wire awareness. The R66 would have alerted me of wires. I recently completed some training with one of Robinson's top flight instructors and we even talked about wire strike prevention, however, we were in the R66 with advanced avionics.
