Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Broken Oil line that runs to oil pressure gauge.
 Nose Landing Gear Collapsed, Bracket that holds nose assy. in place has ripped off of plane.
 Nose Gear well Damaged/ripped apart
 Prop Strike. Prop was not visibly bent.
 Most engine bay cowlings are dented/bent now.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Woke up at 4:30 AM as usual for a work day. Drove to KHUM in Houma, La. Checked my weather apps in my truck (forecast & my radar) before walking to plane. Did normal pre-flight and took off from Houma at 5:29 AM CDT. Planned on about a 4 hour flight with KPQL as my destination in Moss Pt. Mississippi. Flew East bound ^{at 1500 ft} for 45 minutes until I got over the "fishing grounds" or the Chandeleur Sound East of New Orleans. After about an hour and twenty minutes, I was over Freemason Island. I smelled smoke and noticed my oil pressure dropping quickly. I started climbing from 1500 ft and turned toward Chandeleur Island as quickly as possible. About the time that I reached 4500 ft, I had gotten close enough to the Island to pick a landing spot. The wind was out of the southeast, so I picked my landing spot and started descending. Around that time, engine oil pressure had dropped to Zero and the cabin was filling with smoke. I deployed my landing gear, locked my pilot door in the open position and pulled the engine to idle. I had my life jacket on, my fire extinguisher in my pass. seat, and my 3 point harness on. Slowed the plane down and put in full flaps. Turned my Avionics, and Master switch off ~~out~~ around 300 ft. Landed the plane to the South on the North end of Chandeleur Island. I felt the nose wheel trying to dig into the sand so I lifted it back up with the yoke...

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Hard oil line that feeds oil pressure gauge broke in-flight and pumped all engine oil out covering fuselage, engine, windscreens in engine oil.

Use this space if additional space is needed for any answers.

~~Q~~ Narrative Cont'd...

I tried to set the nose back down lightly but it tried to dig in the sand again. I pulled the yoke to my chest to bring the nose wheel up a third time, but it was too deep into the sand and dug in deep. The nose gear subsequently collapsed backward causing the nose of the plane to drop and causing a prop strike. When the prop struck, the plane had enough momentum to stand up on its nose cone before falling back onto the main gear and settling into its final position. I then pulled the mixture, turned off the mags, and turned the fuel off before exiting the plane as hastily as possible.
