Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to outboard left aileron, tail boom crack behind main wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon approaching glider port for runway 35, landing gliders in front of me noted via radio a 180 degree wind shift. I amended my pattern to use runway 17 instead. Flaps were set to position 5, aircraft trimmed to 60 knots. On just at touch down, a crosswind gust lifted the aircraft and the right wing came into contact with the tall grass and started a yaw to the right. I corrected with rudder and left stick, the aircraft yawed left and departed the runway into the grass on the left. The grass grabbed the left wing and spun me around where the tail boom hit. The aircraft then rolled backwards a few yards before coming to rest.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I needed to maintain directional control and avoid dropping the wing into tall grass.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
