Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engine and Propeller seperated from airframe. Aircraft flipped over and destroyed all tail surfaces. Wings have damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately, 13:50 CDT on June 13, 2024, I departed KBKX with 300 gallons of 2-4D spray solution and 230 gallons of Jet A fuel on board to spray on 6 different pastures in the Brookings, SD area. The first four fields, the application commenced as normal. At approximately, 15:55 CDT I was finishing my last clean up pass on field number 5, heading South West. As I was pulling out of the field a flock of ducks flew up in front of me. I applied a little more pressure to the stick to climb above the ducks but it was not enough and I came in contact with some of them. At this time, I was approximately 30ft off the ground. Initially thinking the ducks ended up in my spray gear and the main landing gear I continued my climb in order to clear the shelterbelt and the pole line on the south end of the field. A few seconds after contact with the ducks, I felt the engine quit producing thrust. I verified this by checking my engine gauges and witnessing the N1, torque, and EGT gauges rolling back. I pushed my power lever forward to verify the engine had in fact quit as it had no effect. At this time, I am approximately 80 ft above ground. Having no altitude and running out of airspeed, my only option was to land straight ahead. I pitched the aircraft down to gain a little more airspeed and when I was just over the ground I put the aircraft into a three-point landing configuration. I did not use flaps. As the aircraft came into contact with the ground, the main landing gear sank into the wet ground, as we had a good rain shower that morning. The aircraft then flipped on its back. At the time, I had 20 gallons of product on board and approximately 90 gallons of fuel. When everything quit moving I exited the aircraft as quickly as possible.
