NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Bretten's (Instructor) account;

Practicing power off stalls for today's lesson. Upon reaching our stall we got a right wing drop and when trying to recover, student added right aileron and right rudder. This tightened our turn do to the wing drop and got us into a spin situation. We reached a pitch down point of 15 degrees when I looked at the screen. Tried to get us out of our situation with input of left rudder and tried left aileron as well. Realizing I was going to be unable to correct our flight attitude I made the decision to pull CAPS. Roughly 2800'MSL with a VSI exceeding 2000fpm descent and a rapidly increasing airspeed.

Sarah's (Student Pilot) account;

We were working on stalls for our lesson. I was supposed to accomplish a Power-off stall. I believe I had tried to recover too early and when trying to go back to the stalling point we had begun to lean to the right side and started spinning. Once my instructor realized there was no way to recover, he pulled the CAPs handle and we landed in a cornfield in Hillsdale.

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Parachute strap caught the left door during deployment and ripped the door open. On ground impact the door slammed shut and jammed. The emergency evacuation was made through the right door.

The pilot reports that a first responder with aviation experience informed him the ELT was activated and that the first responder turned the ELT off.
