NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of June 30th, I was operating from our private strip. I was carrying loads of 350 gallons in an AT-402. By 10:30 AM, the temperature had reached 96°f. The plane failed to lift off during take-off, due to the density altitude. I attempted a controlled dump near the end of the runway to try and get off the ground. The plane gained enough lift to jump the ditch at the end of the runway, but immediately stalled to the left into the trees.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have carried a smaller load since conditions were not favorable.
