Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Total loss to aircraft. The tail boom folded in on itself, the windscreen is busted out, and the fuselage is collapsed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Eli was taking one last clean up pass at the end of a small field, he attempted to spray as he was lifting out of the field that was narrow with not enough speed to gain altitude. Eli did not see the dead branch sticking above the rest of the tree in time to climb out of the field, as the helicopter passed over the dead branch the tail rotor collided with it. It immediately started spinning to the right, the helicopter struck the tree again on the way down, and crashed to the ground landing the helicopter on its left side. Eli immediately exited the helicopter.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Follow your training and always allow yourself room to safely operate the aircraft, always leave yourself a way out if the situation isn't what you expect. Don't get distracted and always keep your eyes scanning to be aware of your surroundings. Rule number one, fly the aircraft because spraying is secondary.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
