Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

All three prop blades bent. Engine sudden stoppage. Belly skin under main part of the cabin ground away. Both exhaust stacks damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On Friday, July 12, 2024, myself and a friend departed Henderson, KY (KEHR) at approximately 11:50 am for a local flight. After checking the Mount Vernon, IL (MVN) AWOS and ADS-B weather for MVN and finding good VFR weather, as I remember, it was wind 180 at 3 knots, 10 mile visibility and clear, my passenger and I decided to have lunch at Bonnie's Café in the MNV terminal. Descending down to pattern altitude for runway 24 I became aware the runway was closed. I then started circling to runway 15. While focusing on the runway and the landing I inadvertently failed to lower the landing gear resulting in the gear-up landing. I closed the throttle at about 200 feet AGL and we landed softly on the pavement. I turned off the master switch and pulled the mixture control. Neither of us sustained any injury and we exited the plane using our respective door. I do not recall and neither does my passenger recall hearing the gear horn. This is not an excuse. In closing, there was nothing wrong with the landing gear system, I just did not lower the gear.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Double and triple check gear down.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
