

Alexander Lemishko
Senior Air Safety Investigator
NTSB, Central Region

Date: July 20, 2024

Subject: Memorandum for the Record CEN24LA281
Witness Interview Summary

Contacts: Alexander Lemishko - NTSB IIC

Interview Summary – Donald E. Anderson – [REDACTED]

Mr. Anderson was a private pilot. He reported that he saw the airplane takeoff from runway 25 at Mansfield Airport. The airplane climbed to about 100 ft, and the wings began to rock back and forth in what appeared to be an aerodynamic stall. The airplane then quickly descended and impacted the ground about 30 yards left of runway 25. The airplane's engine was still running. First responders arrived to help.
