July 27, 2024 accident at T67 Hicks Field, Ft Worth

At approximately 11:00 A M , J-3 Cub 98813 Donald Rhodes and Michael Heath taking off to south Michael flying. Airplane came up on main gear while moving down runway. Aircraft made an abrupt left turn off runway presumably from P Factor. I could not recover with right rudder. I was able to stop left turn but aircraft heading toward PAPI lights. Lights are about 15' off runway and approximately 2' high. I pulled aircraft off ground to avoid lights but left gear contacted lights further pulling aircraft to the left towards hangars. I took evasive action of rudder and elevators and successfully avoided hangar by approximately 30 – 40'. This action stalled the aircraft and came to rest about 40 ' from hangar. Both Michael and I walked away from accident with no injuries.

Re: Statements

Hello Darren.

On July 27th 2024 at approx 11:00 am CST Don Rhodes and I were taking up my Cub 98813. We were taking off to the south from Hicks airfield. As we gained speed on the runway, the aircraft moved to the left and did not feel like it was responding to correct. As we left the pavement and entered the grass, Don tried to get the aircraft to respond. The PAPI then presented as an obstacle in our path and Don tried to lift over this. I felt the plane strike the PAPI and we were pushed further toward the left in the direction of hangers. Don then made a quick move to the right resulting in the wings of the aircraft being perpendicular to the ground which allowed us to deviate from striking the hanger. The plane then struck the ground and came to rest with the nose pointing NE.

Thank you,
