NOTAMs (D and FDC), AIRMETs, SIGMETs, PIREPs in effect at the time of the accident/incident:

N/A

On the day of July 26, 2024 I departed Fremont, Nebraska (KFET) with the intention of ferrying N6136Z to Alliance Nebraska (KAIA) to help a local Co-op for their aerial application needs.

On this day, I departed Fremont around 12:12pm central time with approximately 228 gallons of Jet A fuel and had planned a cross-country flight, under part 91 flight rules, of approximately 285 nautical miles to Alliance Nebraska. With the current weather conditions being moderate turbulence with a wind direction of 140° true and wind speed of 7 knots, I had anticipated for two hours and five minutes en route to my location at an altitude of 2,500-3,000 ft. My ETA was 1:17 pm Mountain time.

Upon arrival, I began to descend to approximately 500 feet AGL 17 nautical miles out and had begun listening to the ASOS of 135.075 to gather current weather information. I then tuned to the CTAF of 123.0 where I made a 10 nautical mile out call from the east to inform any other traffic of my whereabouts. At the time of the accident, there was no traffic in the area and no other airplanes involved.

Following my last position report I flew another 3 miles when I witnessed the EGT (in degrees Celsius) and

torque gauge (PSID) "rollback" to zero. My initial reaction after 5 seconds was to add power but to no luck. By this time, there was no chance of a mid air restart given the situation I was in. At 500ft. with no good areas to land, I was left with the difficult decision to land on and around rolling sandhills and uneven ground with no roads. I made a forced landing in a gated off pasture located at latitude 42°02'47.6" N and longitude 102°38'36.2" W approximately 7 nautical miles East of Alliance municipal airport. The area was unpopulated. Following the accident, I observed a gap in a steel welded fence where I drove through after the point of touchdown. (See drawing)

Post examination of the aircraft following the accident includes:

- Damaged leading edges on both wings
- Collapsed right landing gear
- Damaged tailwheel
- Substantial prop damage
- Damage to a fence

- ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Substantial damage to the aircraft, Leading edges damaged, right main gear damaged Tailwheel damaged.

steel welded fence damaged on owners property located in a pasture 7nm E of Alliance

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I departed Fremont, NE (KFET) port 91 ferry flight to Alliance, NE (KAIA) to help West Colap spray fields. (See attached for more)

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
