Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, engine off mounts, Tail section and rear fuselage crushed, wings wrinkled, plane upside down

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed airstrip with normal 1682.75 lbs. of chemical load to the north with 8 knot headwind and 82 degrees in temperature for insecticide application on cotton. Takeoff was normal using roughly 1600 ft of the turf runway; climbed up to 120ft agl and approximately 1/2 mile from strip when altitude began to be hard to hold. Pilot elected to keep flying into the wind while determining the problem. Engine seemed to be not producing enough horsepower to maintain altitude. Pilot was crossing flat cropland terrain and came upon power lines. Pilot was unsure if able to pass clear over lines and dove underneath to clear power lines when aircraft continued to settle into rice in which pulled to aircraft in abruptly and hence turned aircraft on its back. Emergency dump of chemical was not taken due to possible emergency landing in muddy field and to hopefully prevent a flip over onto the back of the plane.

RECOMMENDATION (How could this accident/incident have been prevented?)
