

Alexander Lemishko
Senior Air Safety Investigator
NTSB Aviation, Central Region

Date: August 27, 2024

Subject: CEN24LA330
FAA Examination Findings

Contact: Alexander Lemishko, NTSB IIC
Thomas Hakes, FAA IIC

The FAA reported to the NTSB IIC that the left main landing gear axle was found completely fractured. The left main landing gear wheel assembly was found separated from the axle.
