Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

LEFT wing partially torn from fuselage, fire well forward twisted, undercarriage sheared, front nose wheel folded up under fuselage.

No damage to other property

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

approx 8:30 AM (CT) I along with passenger (also a pilot) departed JBV Rwy 090 for a T & G prior to a planned breakfast flight. Upon completing T & G continued climb to 3500 approx heading 080. Upon reaching 3500 ft I leveling off, passed control of A/c to passenger pilot. He requested to do a 360 turn to see how plane felt compared to his own plane. Upon completion of 360 turn control of aircraft was returned to myself. Approx 5 min later I observed my A/c engine coolant beginning to rapidly ~~rise~~ rise. I began a turn back to the originating airport. As engine coolant continued to rise I lowered RPM's and ~~the~~ slowed aircraft. I continued to lower RPM's in hopes of bringing coolant temp down/on at least preventing from continuing to rise. As I was diagnosing problem we decided to try for a closer airport 1M1. But the only way to keep safe speed and safe altitude was causing the temps to climb into overheating, I began to have steam/smoke/smell come into cockpit. Made decision that reaching alternate airport not possible began looking for best off airport

landing area. Found two best choices and began descent. Choose an E/W subdivision GRAVEL ROAD as preferred OBSERVING AN adjacent open field next to ROAD. The other choice had N/S PAVED but had some ROAD traffic and powerlines adjacent to ROAD. I cleared the power lines perpendicular to the open field but began to get too slow so dropped nose and placed aircraft down onto open field. OBSERVING A large outbuilding ahead of us I felt safer to angle away toward the gravel access ROAD.

I failed to observe a small raised dike and a shallow ~~low~~ water drainage ditch adjacent to ROAD.

When A/C hit dike and then immediately the ~~low~~ shallow drainage ditch it threw the plane into a skid of which I was unable to correct on the loose gravel. Crossed ~~the~~ shallow drainage ~~at~~ subdivision access ROAD where left wing contacted a tree spinning to A/C 360° coming to rest. Pilot & passenger climb out without assistance. The homeowner whose yard we cross saw the aircraft hit tree and came to rest. He called 911 and came to check on myself and my passenger.

State Patrol responded along with local fire and emergency vehicles, and a county sheriff deputy.

No services needed no rendered.
