

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: East Troy State: WI

 ZIP: 53120 Country: USA

 Latitude: 42.47.54.3N Longitude: 88.20.42.7W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 09/02/2024 Local Time: 3:30pm
mm/dd/yyyy

 Time Zone: CDT

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N32435

 Manufacturer: PIPER

 Model: PA-28-140

 Serial Number: 28-7525066

 Year of Manufacture: 1974

 Amateur-Built: ☒ Yes ☐ No If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

- ☐
- IFR-Equipped and Certified
-
- ☐
- Commercial Space Flight
-
- ☐
- Unmanned Aircraft

 Maximum Gross Weight: 2150 lbs.

 Weight at Time of Accident/Incident: 1800 lbs.

 Number of Seats: 4 Flight Crew Seats: 1

 Cabin Crew Seats: 0 Passenger Seats: 3

 Number of Engines: 1

 Skydiving near and around the airport.

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Landed in a corn field, damaging the nose strut, engine truss mount, cowling, propeller, forward fuselage section. L/H and R/H wings sustained substantial damage, including but not limiting to the spar and outboard wing tips. L/H side of fuselage sustained structural damage due to the wing impact. Fuselage wingbox structure damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My preflight started in the morning, I checked the weather on aviationweather.gov and checked for notams and any TFRS via Garmin Pilot. Weather looked fantastic, calm winds and high ceilings. When I arrived at the airport, I did a standard preflight walkaround using a printed out checklist from the POH. I sumped the fuel tanks and firewall drain, checked the oil quantity, checked the flight controls, checked the wings, visually checked the fuel level of each wing tank, removed the pitot cover, and checked exterior lighting.

After everything looked good per the checklist, I pulled the airplane out of the hangar, I started and taxied to runway 08. At this time, I checked weather on AWOS and performed runup checks including checking magneto drop, carb-heat operation, idle rpms, vacuum pressure, checking all gauges and confirmed I had good indication of oil pressure, temps, fuel pressure, and fuel quantity. I checked fuel pressure with boost pumps on and off.

Pre-takeoff: I used the placarded pre-takeoff checklist on the instrument panel and took off uneventfully to the east. (fuel selected L/H) I climbed to 3,000ft MSL and performed slow flight maneuvers. I then climbed to 4000-4500ft MSL and practiced power on, power off stalls and steep turns, and switched fuel selector to R/H tank. I was getting a feel for the airplane's controls since this was my first time flying outside of the pattern with the aircraft. Throughout this time, I stayed within about 10 NM East of East Troy Airport. I noticed small changes in fuel pressure, about 1psi variation, but nothing that seemed concerning since the Fuel Pressure normal operating limits are .5-8PSI.

After about an hour I returned to the airport, landing on runway 08, taxied back to runway 08 and checked engine gauges, including fuel pressure with and without the boost pump. I noticed that the fuel pressure dropped slightly, about 1psi without the boost pump but still within limits. I then performed the pre-takeoff checklist as before, I switched back to L/H tank (fullest), and verified boost pumps were on, engine instruments were in the green, and full rich mixture. I then set my flaps for a short field take-off maneuver. I taxied on the runway, applied full brakes and added full power, verified 2275 PRM and took off. As I started my climb I noticed the fuel pressure was dropping but I had no runway remaining to abort. As I continued my climbout, the engine was surging, along with the fuel pressure gauge varying between 0 and 4psi.

At this time, I leveled off and verified boost pumps on, airspeed was dangerously slow, and I was unable to maintain altitude. I immediately increased airspeed as I decided on the field to my right. Crash landing in the corn field. I don't think I was anymore than 300 ft off the ground throughout the takeoff.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

More training and experience may have resulted in a better outcome. Having a plan of action in case of an engine failure before taking off may have resulted in a better field for landing.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)

Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
 (If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff
 (Convert from pounds, as necessary)

30 _____ Gallons

Fuel Type
☒ 100 Low Lead
☐ Automotive

☐ Jet A
☐ Jet A-1

☐ Unleaded AV
☐ Other, specify _____

Other Services, if any, prior to departure:

EVACUATION OF AIRCRAFT

Was an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

Before exiting the airplane I turned off the fuel selector, pulled mixture to idle cut-off, turned off all electrical and turned off ignition switch. I then exited through the entry door.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft.)

Aircraft Registration Number

Manufacturer: _____

Damage to Other Aircraft:

☐ Destroyed☐ Minor☐ Substantial☐ None

Model: _____

Registered Owner of Other Aircraft

Pilot of Other Aircraft
