Flight Statement

We did our ground school the day before so it was a pretty quick lesson on what we were doing for the day. We left the pad around 9:30 after doing our pre flight checks. We flew a couple patterns. The main goal of the day was to practice my straight and level flight. After a considerable amount of time we headed to the pad with 30 minutes left to practice hovering. It was my first time. I started with one control at a time, and when I got decent at that I was given all controls. I'm not sure the exact time but with about 10 minutes left we decided to do I move hover before heading back. I was given controls and after a couple seconds we pitched back, I heard a grinding and the helicopter shook. The next thing I remember is my head hitting the window as the helicopter rolled to the right. My headset flew off before I was thrown back against the window and we landed on the right side. After that we shut the engine off made sure we were both okay and the airport staff started arriving.

I was teaching Grace to hover. We had been practicing for about ten minutes. I gave her controls but was very close on the controls. We were stable but drifting slightly aft and to the right and down. When she did too much aft cyclic, I immediately countered with forward cyclic, but we were a little too low and the tail hit the ground. I didn't feel the tail hit. We were in what felt like a stable hover for about a second after and then started to get violent vibrations and heard a grinding noise. I immediately lowered collective to try to set down and prevent a rollover but the right skid broke off and the aircraft rolled as soon as we touched down. I shut down and made sure Grace was okay and then we exited the aircraft.
