Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 10:00 MT, I conducted a normal approach to land with my CubCrafter Carbon Cub FX-3, tail number N822TL, on Runway 9 at airport 20V (Mc Elroy Airfield). I had intended to do a normal three point landing to a full stop. After the landing, the plane began to drift to the left and I made the decision to execute a go around. I applied full power, and with the increased left turning tendencies with the Carbon Cub being a tailwheel airplane, the plane pulled further left and off the runway. Because the plane is equipped with large tires for off runway use, I continued with full power for the go around. Unfortunately, there was a drainage swale just off the runway, so the plane dipped down into the swale and then up the opposite side. This caused the plane to become airborne prior to reaching Vr so the plane pitched down and impacted the ground nose first.

There was substantial damage to the plane, but I remained conscious and was able to exit the aircraft and walk away from the aircraft until emergency personnel were able to arrive. I was transported to the hospital for a full evaluation to ensure I was safe. The only outcome for myself was a black eye.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Full stop landing

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
