

Aaron Sauer
Sr. Air Safety Investigator
Office of Aviation Safety - Central Region

Date: 02/12/24

Subject: CEN24MA111

Contact: Semi Driver - George ([REDACTED])

According to George, he was driving a semi-truck on Interstate 15. He observed some aircraft type lights just before seeing a fireball. Following seeing the fireball, he pulled off to the side of the interstate and contacted 911. He watched a small fire that followed after the fireball and then the small fire extinguished about 15 minutes later. George stated that it was raining very hard and foggy above him (not a ground fog, but more like very low clouds). George said his truck was equipped with a camera looking forward and would inquire to his management about providing a copy of the camera video.
