Description of Damage to Aircraft and Other Property <i>(Use additional sheet, if necessary.)</i> AIRCRAFT OVER RAN HIT A DITCH, WINGS AND NOSE DAMAE GEAR COLLAPS					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink.)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible. I started the engine around 11 AM local time, obtained the ASOS, and taxied to Runway 15. Holding short of 15, I waited a bit to allow the engine to warm up. I've always believed in being gentle on my engine. After completing the run-up, everything was in the green, and the engine sounded perfect. We took off and headed southwest to 2H5 to perform lazy eights, eights on pylons, and other commercial maneuvers. I chose 2H5 as a potential landing spot in case of an engine failure, with enough farmland nearby. After flying for about 45 minutes, we headed to KARM to perform power-off 180s. After executing three of them within standards set by the ACS, I decided to return to KIWS. I climbed and leveled out, and again, everything was in the green on the engine monitor; nothing sounded off. While cruising, my friend suggested we do a soft-field landing, so we decided on a touch-and-go at X09, which is a grass runway. I had become quite proficient at soft-field landings I entered the left base for Runway 35 at Covey, then turned final for Runway 35. I confirmed the gear was down and the flaps were set, and I noted there were no other aircraft in the pattern. My approach speed was 68-70 knots, given the moderate headwind and slight crosswind from the northeast. I buttered the Mooney onto the soft field and applied full power to depart to the northeast. I turned at about 300-400 feet for the right crosswind; I always turn sooner because there are many houses and a large shopping center at the departure end of Runway 35, which doesn't provide an out that close to the ground. After turning northeast, I was climbing to 700 feet when I noticed an weird smell. A couple of seconds later, I heard a loud explosion, and the aircraft shook violently, becoming difficult to control. I realized I had lost full engine power. I reacted by scanning 45 degrees left and right, looking for an out. I saw none; the highway was packed due to rush hour, and everything else was houses. I remembered that behind me was a large shopping center, which was another reason I had turned earlier—to avoid that area. Within one or two seconds, I decided to turn back toward Covey for runway 17. I immediately pitched the nose down and turned the aircraft around. Once I had the aircraft pointed toward the airport, I dropped my landing gear and made sure everything else was set: mixture, throttle, prop, and fuel tank on full. Realizing the engine wasn't going to come back to life, I proceeded to reduce the propeller pitch for extra gliding distance. I tuned into 121.5 and declared, "MAYDAY, MAYDAY, MAYDAY, N9151V, engine failure, landing at Covey," relaying my position as I entered the base and final approach, as the only available option in that area was runway 17 at Covey, which had a strong tailwind. I slipped on final just before touching down I let the slip go. The moment I touched the ground, I slammed on the brakes, but since it was a grass runway, it felt like ice. When I realized we were heading for a ditch, I kept flying the aircraft until impact, declaring one last time and bracing my passenger and myself. We hit the first ditch, then the second, and finally came to a stop.
