Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

scraped L&R wingtip
 bent L&R aileron
 broken L&R rear wooden spar of lower wing
 broken spokes of L wheel

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 10/21/2024 at approximately 1100 I departed Denton Enterprise Airport (KDTO) in my Boeing Stearman A75N1 (PT17) N62394. As I was climbing over the departure end runway 18L I noticed the aircraft climb rate was lower than expected. A few moments later the engine began to run rough at full power and any other power setting. The roughness of the engine worsened quickly. I turned right 90 degrees to stay near the airport. The engine quit completely for approximately 1 sec then returned to running rough. I immediately reduced throttle to idle, turned directly to a downwind landing on 36R and declared an emergency.

My emergency landing with a 12kt tailwind developed into a ground loop which damaged the aircraft.
