

7521Z Incident – 10/27/2024

Jerry Spiller Written Statement

"Picked up about 18 inches of manifold pressure. Started peddle turn to face taxiway. Then after there was a violent lurch to the right and I don't seem to remember too much after that. I remember slamming the collective down but it did not make too much difference." "Whole thing seems like it lasted 3 seconds or so"
