Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft impacted the ground in a nose down right skid down attitude. The aircraft came apart, the fuselage is destroyed and the rotor blades and drive train are damaged beyond repair.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was on a personal flight returning to my home airport KPWG, I suffered a spontaneous engine failure, the RPM dropped to zero. I had no indications anything was wrong. I entered autorotation successfully, descended nicely and was trying to get to an open field. But upon further descent I saw powerlines that I would not be able to clear, so I turned away. At that point my only option was a small clearing in someone's backyard. This was limited to a very confined area surrounded by trees, The rotor blades hit a limb which upset the autorotation and I fell about 10-15 feet and crashed on the nose and side.

RECOMMENDATION (How could this accident/incident have been prevented?)
