Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft struck trees and bunt to the ground. Trees are damaged from impact and being burnt.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After performing the engine run-up checklist in the run-up area for runway 17 at Lubbock Executive Airport (F82) i entered runway 17 for departure to Addison (KADS). i just started my takeoff roll trying to gain speed for rotation, when i got to around 50 knots i felt a quick shake/wiggle and instantly the plane turned hard left. i reached to pull power and pressed the right rudder as much as possible but it didn't matter the plane kept pulling to the left. Just to the left (east) of runway 17 at Lubbock Executive Airport (F82) there is a group of trees that i was unable to keep the left wing of the plane from striking and tearing off, once the left wing struck the trees the front of the plane was catapulted into the group of trees killing the engine and deploying the air bags. The plane seemed to have hit more than one tree as it came to rest with the left wing torn off and the right wing up in the air with the passenger door also facing towards the sky. As soon as the plane came to rest i seen a fire start instantly at the engine and before my passenger and i could even get unbuckled the plane was completely engulfed in flames. Both my passenger and myself were able to climb out of the passenger door, jump through the fire and run to the runway/taxiway before it started exploding.
