☒ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Panel smoked out and gear didnt lock in place, so gear damage and skin/structure damage to belly. The propeller struck the ground and folded.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon departure, as we banked left to turn on course, the panel began to smoke and spark. The Generator was turned off to reduce the cabin smoke. This took out all electrical in the plane. The generator was turned back on trying to turn radios back on, and the panel started to spark and smoke again so I shut it back down. We made a left turn to final of runway 04 and tried to lower the landing gear, and it failed due to no power. I turned the generator back on and lowered the gear. The lights wouldnt work to confirm gear was down, so we confirmed gear was down by visually seeing them in the shadows, and looking at the manual gear lever. The lever was confirmed to be straight up which indicates the gear is down. So i committed to landing the plane. I floated the plane as long as possible down the runway. The gear collapsed upon landing the plane and we skid down the runway. When we came to a stop we opened the door and exited the plane and waited for the emergency response team.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The initial incident of the panel smoking/sparking was not preventable. The only additional response tot he landing gear would be to grab the manual gear handle and physically verify handle was all the way forward.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

landing gear did not fully lock in place
